Hi Suhas, you are right. The ABAP Unit framework doesn't require that the code under test is OO, but if you want to test effectively and isolate the code you are testing (keywords: substitutable dependency and test doubles), then ABAP OO is the way to go. In my experience, there is little difference between testing global and local classes.

Classical way to ABAP OO style of coding | SAP Blogs

The way to check the whitelisted ABAP APIs for the SAP Cloud Platform is to browse the Released Objects lists. It is accessible in Eclipse ABAP Development Tools (ADT) -> Project Explorer -> Released Objects. So, the cloud-ready ABAP API to send HTTP request is the `if_web_http_client`. We define the following method to get a client: [definition]

The SAP Java Connector (SAP JCo) is a development library that enables a Java application to communicate with on-premise SAP systems via SAP's RFC protocol. It combines an easy-to-use API with unprecedented flexibility and performance. The SAP JCo supports both communication directions: inbound Remote Function Calls (Java calls ABAP) as well as outbound Remote Function Calls (ABAP calls Java).

SAP Java Connector
