Enactivism And The Unity Of
Externalism is a group of positions in the philosophy of mind which argues that the conscious mind is not only the result of what is going on inside the nervous system (or the brain), but also what occurs or exists outside the subject. It is contrasted with internalism which holds that the mind emerges from neural activity alone. Externalism is a belief that the mind is not just the brain or ...

In the shop for Unity (wahdat); anything that you see there except the One is an idol. Other Sufi mystics however, such as Ahmad Sirhindi, upheld dualistic Monotheism (the separation of God and the Universe). The most influential of the Islamic monists was the Sufi philosopher Ibn Arabi (1165–1240).

You have surely heard about cultural differences in reasoning, how people can fabricate reasons when asked to explain one of their decisions, and how many people seem systematically susceptible to reasoning errors. Much of this research was contributed by Richard Nisbett and their colleagues. Dr. Nisbett was kind enough to

The focus on experience might appear to nudge enactivism towards the Feeling Tradition (see, e.g., Ratcliffe 2008). Enactivism is indeed influenced by the notion, central to the phenomenological philosophical tradition, that the body is an experienced structure (Husserl 1952 [1989]; Merleau-Ponty 1945 [1962]) rather than simply a physical ...

Emotion (Stanford Encyclopedia of Philosophy)
The brain is like an ant colony, using hormones and electrical impulses to keep its disparate parts acting in unity. Under this model, consciousness can be defined as the push and pull between these parts, and self-awareness as the consensus model under which the separate parts reached some equilibrium.
