Looking For by Morton
A. Meyers, M.D. is
exactly what the title
touts: many medical
breakthroughs are a
matter of being at the
right place at the right
time or as Louis
Pasteur is quoted to
have said, "In the field
of observation, chance
favors the prepared
mind."

Dr. Meyers, who has been one of leading abdominal radiologists in the world for more than 30 years, has recently written a book entitled "Happy Accidents: Serendipity in Modern Medical Breakthroughs." While I am reading the book, I feel an urge to introduce this book to all readers of the Korean Journal of Radiology. This book is based on a long

out. It is a MUST read.
Please go buy it. Read
it twice, not once.
Although the author
does not take my
drastic "stochastic
tinkering" approach, he
provides all kind of
empirical evidence for
the role of design.

Happy Accidents (2011) explores the invaluable role that false assumptions, unlikely circumstances, and sheer dumb luck have played in some of medicine's biggest discoveries. From antibiotics to antidepressants, heart surgery to chemotherapy, some of today's most important drugs and treatments are the result of serendipity —
