Manual Focus Lens For Sony

This extreme 650-1300mm f/8-16 Manual Focus Lens from Bower is an economical way to achieve some ultra-telephoto photography, all the way up to 1300mm. This is a T-mount lens, which means that aperture is not communicated to or controlled by the camera body, and as such must be used only in aperture-priority auto-exposure mode (if your camera has it) or in the manual exposure mode.

Questions ...

Importantly, when I focus on the same target using autofocus, all is perfectly fine (some lenses maybe need a bit of lens correction but that is to be expected). The problem is that if I use AF for my normal shooting I don't see the image in the viewfinder perfectly sharp (for example tree branches in a distance).
