The lube oil of a two-stroke marine engine consists of two individual systems; cylinder lube oil system and main lubrication system. But for four-stroke marine engines, there is a single lubrication system for both crankcase and cylinder lubrication. The main or crankcase lube oil system consist of six main elements; sump/drain tank, strainer ...

Ship's Main Engine Lubricating Oil System | An Easy Guide

The Rankine cycle is an idealized thermodynamic cycle describing the process by which certain heat engines, such as steam turbines or reciprocating steam engines, allow mechanical work to be extracted from a fluid as it moves between a heat source and heat sink. The Rankine cycle is named after William John Macquorn Rankine, a Scottish polymath professor at Glasgow University.

Rankine cycle - Wikipedia
