Preeclampsia is one of the leading causes of maternal and infant morbidity and mortality. It is characterized by a high blood pressure, protein in the urine, and leg swelling (signs of kidney damage).

Maternal Blood Test may Help Rule Out Pregnancy Complications
Maternal and Child Health Rationale. The improved health of mothers and children has long been a rationale for the provision of family planning (Seltzer 2002).In the 2009 round of the Family Planning Effort Index, measured periodically since 1972, women's health was the dominant justification for family planning programs, followed by reducing unwanted fertility (Ross and Smith 2011).
